

IIR Working Group

Life Cycle Climate Performance Evaluation

Meeting Minute

Ninth Meeting at Edinburgh, U.K. on August 23, 2016

1. Presentation: LCCP WG Progress Overview and Final LCCP Guidelines by Yunho Hwang (University of Maryland)

- Latest progress of LCCP WG was provided.
- Final version of LCCP guideline was presented.
- Water chiller sample program results were shared.
- Sensitivity study results were presented.
- LCCP reduction results from application of advanced cycle options were provided.
- Final version of informatory note was submitted.

2. Discussions and Comments

- Some references are very old. Better to update references. >> We are open to receiving reference information.
- CO₂ emission in power generation: better to use worst value; better to use regional value >> We want to stay on regional value.
- Current working group effort is completed with this meeting.
- However, reference database will be keep updated when new reference data are found.
