Presentation, Holger König, ref-tech engineering
Presentation, Niels P. Vestergaard, Danfoss
Diskussions on the way forward
Introduction

The introduction was given by the Alexander (Alex) Cohr Pachai (separate DOCX)
Introduction of the speakers
Discussion

- Concerns about natural refrigerants being over exposed by manufacturers

- ACP: We cannot let ourselves being intimidated and let people/colleagues become injured or even die because of a risk of misuse of data. We will start on a new chapter and old data will not be considered. Only public available data will be considered. We do not want confidential data. It will be a transparent process.

- Data collected will not be used for pointing fingers. It is about doing the right thing. Lessons learned from near-mis and accidents are to be collected and disseminated in a guideline. All refrigerants are covered by the project.

- Consider making a guideline and a summary of 3 pages
Next meeting

- Not yet considered but it is intended to participate at the ICR 2019 in Montreal
- Suggestion of having a meeting at the venue in UK later this year is considered
